Publication Series to focus on Micro Nano Technology Supply Chain

**MST/MEMS Foundries and Design & Engineering Companies are in the Focus
of the first two Industry Reviews of this new Series edited by enablingMNT**

Amsterdam, The Netherlands – 5 Sep 2003 – To coincide with the 8th International Conference on the Commercialisation of Micro and Nano Systems – COMS2003, *enablingMNT* are pleased to announce the release of the first set of publications in a series of in-depth intelligence reviews on the supply chain of micro and nano technologies (MNT).

Driven by user/supplier demands for technology-pull, the *enablingMNT reviews* are focused on all aspects of the MNT product lifecycle; from concept through to production.

The *enablingMNT reviews* analyse the critical issues encountered during the creation process of MNT-based products and provide guidance with regards to the approaches taken to overcome barriers and challenges. All reviews include a comprehensive listing of services offered in the field (including current contact information). The emphasis is on the provision and availability of fully commercial services, infrastructure, and supplies considered to be essential for the commercial realisation of MNT-based products.

Starting the series are two market intelligence reviews addressing the important areas of Design Houses and Foundries, respectively. These reviews assess state of the art processes in the context of the capabilities offered by more than 130 players in this field.

enablingMNT industry reviews will motivate new applications for MNT, enhance confidence in the technology as well as help identify funding sources for research and development. Indeed, these reviews highlight trends from the facts and the prospects. Sponsored by significant players in the field, the reviews are produced and edited by a team of experts with many years of experience in the business of MNT, namely; Henne van Heeren, Patric Salomon, Dr. Lia Paschalidou, and Dr. Ayman El-Fatatry.

enablingMNT industry reviews are offered at a competitive price of €280 per specialist report. To order a copy and/or for more information, please contact the publisher Patric Salomon at:

4M2C PATRIC SALOMON, Cranachstrasse 1, 12157 Berlin, Germany
